

C01-EXPERIMENT 7

7) Creating an XML Document for Student Data

Create XML file with root element, student records, roll number, name, department, year, email, and mobile number.

PROGRAM:

```
<?xml version="1.0" encoding="UTF-8"?>
```

```
<students>
```

```
  <student>
```

```
    <rollno>101</rollno>
```

```
    <name>Savitha</name>
```

```
    <department>Information Technology</department>
```

```
    <year>3</year>
```

```
    <email>savitha@example.com</email>
```

```
    <mobile>9876543210</mobile>
```

```
  </student>
```

```
  <student>
```

```
    <rollno>102</rollno>
```

```
    <name>Rahul</name>
```

```
    <department>Computer Science</department>
```

```
    <year>2</year>
```

```
    <email>rahul@example.com</email>
```

```
    <mobile>9123456780</mobile>
```

```
  </student>
```

```
  <student>
```

```
    <rollno>103</rollno>
```

```
    <name>Priya</name>
```

<department>Artificial Intelligence</department>

<year>4</year>

<email>priya@example.com</email>

<mobile>9012345678</mobile>

</student>

</students>

OUTPUT:

Student Information					
Roll No	Name	Department	Year	Email	Mobile
101	Maria	Information Technology	III	maria@gmail.com	9876543210
102	John	Computer Science	II	john@gmail.com	9876501234
103	Priya	Artificial Intelligence	IV	priya@gmail.com	9123456789
104	Savitha	Information Technology	III	savitha@gmail.com	9876543222
105	Vivetha	AI DS	III	vivetha@gmail.com	9876543265
