

## C01-EXPERIMENT 8

8) Creating a Webpage Using Images,

Hyperlinks, and Iframes Use image tag, anchor tag, iframe, width, height, alt text, and external webpage embedding.

Program:

```
<!DOCTYPE html>

<html>

<head>

    <title>Images, Hyperlinks and Iframes</title>

</head>

<body style="background-color:#f0f8ff; text-align:center; font-family:Arial;">

    <h1 style="color:darkblue;">Images, Hyperlinks and Iframes</h1>

    <!-- Image -->

    <h2 style="color:green;">Image Example</h2>

    

    <br><br>

    <!-- Hyperlink -->

    <h2 style="color:purple;">Hyperlink Example</h2>

    <a href="https://www.google.com" target="_blank"

        style="font-size:20px; color:red;">

        Visit Google

    </a>
```

<br><br>

<!-- Iframe -->

<h2 style="color:brown;">Iframe Example</h2>

<iframe src="https://www.wikipedia.org"

width="700"

height="400"

title="Wikipedia">

</iframe>

</body>

</html>

Output:
