

17) Create an Online Quiz Application with Automatic Scoring

HTML question interface, CSS card layout, JavaScript array of objects, functions, events, conditional statements and score calculation.

Code

```
<!DOCTYPE html>
```

```
<html lang="en">
```

```
<head>
```

```
  <meta charset="UTF-8">
```

```
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
```

```
  <title>Online Quiz Application</title>
```

```
<style>
```

```
  * {
```

```
    box-sizing: border-box;
```

```
    margin: 0;
```

```
    padding: 0;
```

```
  }
```

```
  body {
```

```
    font-family: Arial, sans-serif;
```

```
    background: linear-gradient(135deg, #667eea, #764ba2);
```

```
    min-height: 100vh;
```

```
    padding: 30px;
```

```
  }
```

```
  .container {
```

max-width: 750

Output

The image shows a quiz interface with a light gray background and a purple border. It contains two questions, each with four radio button options. The first question asks for the keyword used to declare a variable in JavaScript, with options: var, int, string, and define. The second question asks for the symbol used for comments in JavaScript, with options: // and a blank space. A blue 'Submit Quiz' button is at the bottom.

4. Which keyword is used to declare a variable in JavaScript?

- ☐ var
- ☐ int
- ☐ string
- ☐ define

5. Which symbol is used for comments in JavaScript?

- ☐ //
- ☐
